

The following is an additional list of plants that were included in the Catalog but with no definite record of their having been found in the County. The type and signs have the same signification as in the preceding list.

<i>Sporobolus serotinus</i> Gray.	BETULA PAPYRIFERA Marsh.
SCIRPUS ATROCINCTUS Fernald.	MYRICA GALE L.
<i>Carex Michauxiana</i> Boeckl.	SPIRAEA TOMENTOSA L.
C. ROSTRATA Stokes.	<i>Gentiana linearis</i> Froel.
— <i>C. lenticularis</i> Michx. (Trenton Falls.)	HYPERICUM ELLIPTICUM Hook.
<i>C. viridula</i> Michx.	GALIUM CLAYTONI Michx.
<i>Alnus mollis</i> Fernald (as <i>A. viridis</i>).	<i>Lobelia Dortmanna</i> L.

A long list of plants could be given that are more or less interesting to close observers of plant distribution. A few of them are *Pellaea gracilis* Hook., *Asplenium Trichomanes* L., *Sparganium angustifolium* Michx., *Scheuchzeria palustris* L., *Sagittaria graminea* Michx., *Carex pauciflora* Lightf., *C. oligosperma* Michx., *C. chordorhiza* Ehrh., *Eriocaulon septangulare* With., *Juncus filiformis* L., *Juncus pelocarpus* E. Meyer., *Spiranthes gracilis* Big. (single plant), *Brasenia purpurea* Casp., *Dalibarda repens* L., *Epilobium lineare* Muhl., *Andromeda glaucophylla* Link., *Epigaea repens* L., *Kalmia angustifolia* L., *Linnaea borealis* Gronov. and *Limnanthemum lacunosum* Griseb.

A number of unsettled genera such as *Viola* and *Antennaria* can be better noted from other sections of the county. The orchids now number forty in Oneida County and forty-two species and varieties in Herkimer County. The writer is confident that further explorations in the White Lake region, at an earlier and later season will reveal additional plants, hitherto unknown in a county which is exceedingly luxuriant in its vegetation and has rather Canadian than Alleghanian flora.

UTICA, N. Y.

SILENE CONICA IN NEW ENGLAND. — Several specimens of *Silene conica*, L., were found by me, June, 1904, in Dartmouth, Massachusetts, in a field newly laid down to grass. A considerable quantity of French clover, *Trifolium incarnatum*, Willd., was also noticed in the same field. — E. WILLIAMS HERVEY, New Bedford, Massachusetts.
